St. Patrick's High School

QUARTERLY NEWSLETTER 2022

From

The Principal's Desk

Our School: Where winning is a habit.

As flowers and fruits are seen in due time and they never violate their time, in the same way our good and strenuous efforts will show their good results. Our school is a beautiful flower garden and there are a number of fruits too. Thanks to ICSE. We have been introducing a lot of newness since 2018. On a war-footing, we completed the first batch of ICSE with cent percent result. Thank you, dear parents, you are our 'pillars' to resonate us with all newness.

We have launched the 11th class. I received an alumni who completed his SSC in 2000 and he smilingly told me that he sees newness in every nook and corner of the school. We salute you for your cooperation and understanding dear parents. Therefore, winning is a habit in our flower garden with unending newness.

We live in a fast-changing world where we get to learn something new every day. Knowledge has increased tremendously. To keep our students abreast with the fast-moving world, we are happy to inform you that we intend to start IIT/NEET coaching classes offered by the renowned Krishnamurthy Academy, to be launched in November 2022 for classes 8 to 10 for 2 days in a week.

How best can we prepare our children to face this fast-moving, competitive world where everyone has to put in that extra effort, go that extra mile to carve a niche for themselves. St. Patrick's is on the path to follow the eternal teachings of God. No compromise. We do what we say.

Wish you all a fruitful reading of our school e-magazine. Don't you think winning is a habit in our school?

Rev. Fr. A. Elango, s.j.
Principal, SPHS

The Editor's Desk

'If you compare yourself with others, you may become vain or bitter, for always there will be greater and lesser persons than yourself.'

- Max Ehrmann

'Is comparison good?' Many a times as students, teachers, parents and individuals we are faced with this question. According to Max Erhmann when we compare ourself with someone better than us, we become dissatisfied with ourselves. We feel at times we haven't given it our best and at times we grudge the success of the other person. When we compare ourself with someone lesser than ourself, we become proud and look down on the person as he/she is not up to the mark and often tend to hurt others either intentionally or many a times unintentionally.

Should comparison be avoided? Let us look at it from a different point of view. Comparison is good when you compare yourself with yourself and not others. It seems a bit strange. Ask yourself, 'Am I better person than I was yesterday? Did I help one more person than I did the previous day? Was I a better son, daughter, mother, father etc today than yesterday?' The list could go on. You have to raise the bar every day and see if at the end of the day you have emerged a better person.

Let us not as teachers, parents and educators compare our children with others instead instil in them the healthy spirit of competition so that we have more 'other centered beings' than 'self centered beings.' As students let us not compare ourselves with other students but strive to be a little better than we were the previous day. And look out for the result, you will be happy with yourself.

World Ozone Day

Ozone is just like our Mother Earth.

It protects us from the harm,

and we should protect it from suffering.

September 16th was proclaimed by the United Nations General Assembly as the International Day for the Preservation of the Ozone Layer.

The ozone layer is a region in the earth's stratosphere that contains high concentration of ozone and protects the earth from the harmful ultraviolet radiations of the sun which cause allergies and skin cancer.

But unfortunately, over use of chlofluorocarbons in our daily life results in the gradual depletion of the ozone layer.

Once the ozone layer is depleted, ultraviolet rays pass through the troposphere and eventually to the earth. These rays cause ageing of the skin, skin cancer, cataract and sunburn to humans as well as animals. Phytoplankton dies in the presence of ultraviolet rays which results in a decrease in fish productivity.

Ways to reduce ozone depletion:

- Avoid emission of dangerous gases in the ozone layer.
- Minimize the use of cars.
- Do not use cleaning products that are harmful to the environment and to us.
- Regular maintenance air conditioners.

To protect the ozone layer, the Vienna Conference in March 1985 was held. In September 1987, the Montreal Protocol was agreed upon. The Montreal Protocol is a global agreement to protect the Earth's ozone layer by phasing out the chemicals that deplete it. The landmark agreement came into force in 1989 and it is one of the most successful global environmental agreements. Thanks to the collaborative effort of nations around the world, the ozone layer is on its way to recovery and many environmental and economic benefits have been achieved.

This was followed by the Kyoto Protocol of 1997. Under the Protocol, 37 nations invest in a decrease of four Greenhouse Gases and two gatherings of gases delivered by them, and all part nations give general responsibilities.

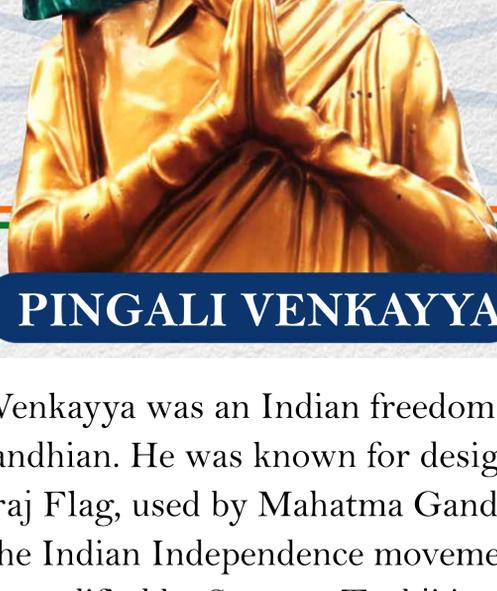

Scientists have observed that ozone depletion level has been lowering since the use of hydrofluorocarbons instead of chlofluorocarbons.

We should also take measures to save this world otherwise it will end soon.

Reddy - VIII A

PINGALI VENKAYYA

Pingali Venkayya was an Indian freedom fighter and a Gandhian. He was known for designing the Swaraj Flag, used by Mahatma Gandhi during the Indian Independence movement and was later modified by Surayya Tyabji into the flag of India. He was a lecturer, author, geologist, educationalist, agriculturist and a polyglot.

At the age of 19, Venkayya had enrolled in the British Indian Army and was deployed to South Africa during the second Boer war (1899 to 1902). During the war when the soldiers had to salute the Union Jack, the national flag of Britain, Venkayya realised the need for having a flag for Indians. When Venkayya attended the AICC session in 1906 in Calcutta, he was inspired to design a flag for the Indian National Congress as he opposed the idea of hoisting the British Flag at Congress meetings.

Various flags had been used by members of the Indian Independence movement prior to the Independence being achieved in 1947. Pingali Venkayya designed the national flag and presented it to Mahatma Gandhi during the latter's visit to Vijayawada city on 1 April 1927. Venkayya's first draft of the flag was in red and green - the red representing Hindus and green the Muslims living in the country. On Gandhi's suggestion, Venkayya added a white stripe to represent all other denominations and religions in India. Since 1921, Venkayya's flag had been used informally at all Congress meetings. The flag was adopted in its present form during a meeting of the Constituent Assembly on July 22, 1947.

Venkayya was an agriculturist and an educationalist who set up an educational institution in Machilipatanam. He died in relative poverty in 1963 and was largely forgotten by the society. A postage stamp was issued to commemorate him in 2009. In 2012, his name was proposed for a posthumous Bharat Ratna though there has been no response from the central government on the proposal.

About my home state:

MAHARASTRA

Maharashtra is one of the beautiful states of India. It has everything you want to wish for – From the cold hills of Naldurg and home for many hill stations which also have important hill temples like Mahabaleshwar, Forests of Pune, and World Class Cities like Mumbai, Pune, Aurangabad, Nashik, Nagpur etc and World Heritage sites like Ajanta and Ellora Caves. The mother tongue is Marathi with small pockets of Telugu, Hindi, Kannada and so on.

Maharashtra is the birthplace of India's famous ruler '**Chatrapati Shivaji**' whose empire had ruled India till 1818 when the British defeated the Marathas in Third Anglo Maratha War.

Maharashtra is the richest state in India having GDP of \$62 billion. Its capital Mumbai is the Financial Capital of India because the major banks of India all have their headquarters in Mumbai.

Overall, this beautiful state is worth your time to visit and don't forget to visit Mumbai.

TEENS

The world around me changed suddenly...

James Herriot, author of 'All Creatures Great and Small' sat in the countryside of Yorkshire Dales in the early days of his apprenticeship pondering about life and comparing how his life had become under Siegfried Farnon. When I think about him and look at myself...

I feel I haven't reached that point in my life where I can decide where and how things are going for me, what am I up to. I'm a little too young for it but I have grown old for everyone around me. I have people reminding me I'm not the same old small Shrosi anymore.

Yes, I have become a teenager.....

I often hear from everyone around me, 'grow up, this is not how you are supposed to behave.' The crucial part of any individual's life is when there is too much of "Gyan" given by everyone. I literally mean 'everyone.' I know you are able to understand what I'm trying to say. At times, I'm okay with people sharing their experiences with me. However, I would like to play my own game and excel in it.

I would like to be that person who can make his own decisions, have control on life (However, I'm a kid here who needs expert advice) so basically an amateur, controlled by adult humans therefore I become a puppet.

I pray I'm not asked to be that good, golden boy who sets an example for his/her sister/brother as I know their feelings as well as mine. I don't think I will be able to do justice. I heard my mom, talk about Maya Angelou's work – The Caged Bird: I felt all teenagers go through that gruesome phase in life like the title of the poem where only the best excel and the others keep trying. That's again my way of looking at things at this point of time "The Caged Bird."

Analyzing and learning is all part of life and I learnt something very important. I have tried to pen this to say to all my friends who are going through this amazing transformation in life of being a teenager. Since we are new to this phase of life, there is nothing wrong in listening and learning from parents. They are the best gift that God has given to us, to mould us and keep us unique.

I enjoy every bit of life being a teenager and hope you also do the same, by valuing your elders advice, learning from the amazing experiences shared by the elders.

Inspiration is not just acquired from books but also from strangers we cross paths with, basically we learn till we die.

Shrosi Marian VIII - D

India@75

Midnight on August 14 - 15, 1947 ended the British colonial rule over India. One of the world's largest democratic countries had come into existence. Indians erupted with joy and heard a soul stirring narrative in the speech of Pandit Nehru "tryst with destiny".

Birth of India's freedom had agriculture as the backbone of economy, with it, the huge task cut out for the technological development of all the sectors including agriculture with social inclusive growth.

In the early years, growth was slow and picked up during the green revolution. The real momentum of growth was evident with the reforms in place in 1991. New slogans of reforms like 'The Ease of Doing Business', 'Start up India', 'Make in India', have pushed the growth rate to double digits.

India, being a hugely populated country, required more jobs. So large scale, small scale and cottage industries were set up to give employment and push the economy. In recent times, the ICT/IT/ITES industry, other service sectors have become partners of progressive India.

Over the years women empowerment, education and security has been given top priority.

Indigenous satellite technologies, missile making, bullet trains, communications etc show our country's self-reliance.

Renewable forms of energy, green buildings, eco-friendly vehicles, awareness programmes and imparting eco importance to students are taken up by policy makers for a clean and green future.

Education system with NEP (National Educational Policy 2020) has been making dynamic strides. University streamlined courses to job-oriented courses, thus our students have become a global workforce.

Health sector made stupendous progress and the increase in life expectancy and low mortality rate speak for themselves.

Though literacy rate has gone up, a lot more can be done to eradicate illiteracy.

Sports is no longer treated as extracurricular activity but as a profession.

In 75 years, India has transformed itself into a self-reliant, developed country from a developing country.

Mission to the moon - Yogi's dream

It was a full moon night; the moon was peeping through my window and the moonlight all over the place in its full glory. I was lazing on my bed with a book on manned space missions to the moon.

It was interesting to read about the first manned mission to the moon by Neil Armstrong and Edwin "Buzz" Aldrin on July 20, 1969. Stepping off the lunar landing module Eagle, Armstrong became the first human to walk on the surface of the moon and spoke these words "That's one small step for a man, one giant leap for mankind." The astronauts also returned to Earth with the first samples from another planetary body. These lines caught my attention and just buzzed in my mind.

Suddenly, a special announcement on television caught my attention that I was selected for the manned mission to the moon by a space ship named "Chandralok" indigenously built by ISRO and I was to bring a water sample from there. It was overwhelming to hear those words.

The very next day I was taken for training activity by an astronaut trainer. He helped train my lung, heart, and other muscles to endure the activity needed for space walking. On the second day, the trainer showed me how to increase my muscular strength and improve upper and lower body coordination by performing the "bear crawl" and the "crab walk" and also to improve the strength in my abdominal and back muscles by performing the "Commander Crunch" and "Pilot Plank" exercises, as these are required for navigating inside a spaceship. For the energy and metabolism required for my space travel, they had designed a five-day menu based on the Food Pyramid recommendations.

I boarded the spaceship "Chandralok" and it dashed into the sky and in the process, I started floating and moving here and there in the spaceship. After navigating miles, I had a smooth landing on the moon and sent a message to all students in India to 'dream big'. Everyone sent me congratulatory messages including the Prime Minister of India. I stepped off the lunar module "Chandralok" and planted the Indian flag. I said to myself I have become the first astronaut from India to step on the moon. Now I had to make a spacewalk and collect water samples.

I found traces of water and was about to collect it, surprisingly I felt water sprinkled on my face. I opened my eyes with great difficulty, to my astonishment it was my mother who was sprinkling water to wake me up. Then I realised the manned mission to "Chandralok" was indeed a dream.

Reading - A Virtue

Reading is to the mind what exercise is to the body

Happy is the man who acquires the habit of reading when he is young. Through reading, everyone secures lifelong pleasure, instruction and inspiration. Reading habit eradicates loneliness and provides an occupation during leisure time. Reading enriches a man with knowledge, noble thoughts and high ideas. Reading books benefit both physical and mental health and those benefits last a lifetime.

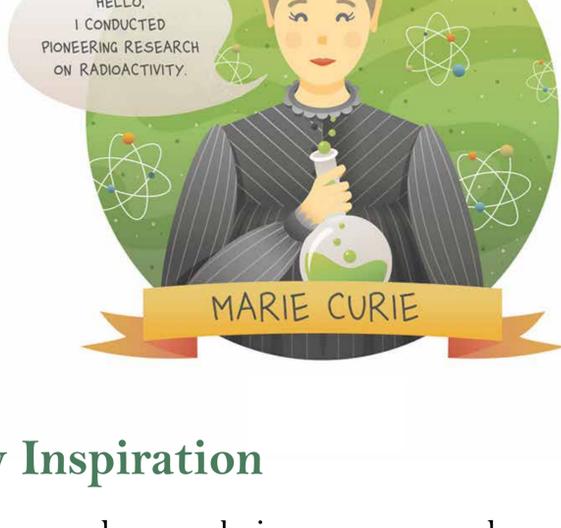

Books not only store but also carry forward great lessons. Books that contain moral values dispel the dark clouds of gloom from our minds and infuse happiness. The knowledge embedded in books is of immense value and so is the pleasure obtained from reading them. Reading is never a waste of time.

Reading should be paralleled with discussion on the subject read, so that different views can be absorbed and analysed. Books are a treasure richer than treasure of any kind. They are gold mines of art, literature, science and information. They are man's constant and the best companion.

"Keep reading! It is one of the most marvellous adventures anyone can have".

Adithya S IX - E

My Inspiration

As we are human beings everyone has an inspiration which motivates us to achieve something great in our life. My inspiration is Marie Curie.

Marie Curie was the first woman to win two Nobel Prize, she discovered polonium and radium and the second Nobel Prize was awarded for her research in 'radiation phenomena.' She was and still is the only person to be awarded Nobel Prizes in two scientific categories.

Marie Curie's original name was Maria Sklodowska. Her father was a great Math and Physics instructor. Marie Curie lost her mother at the age of 10. She was a bright and curious student. In 19th century the society didn't support girls for higher education The government at that time allowed only limited education for a girl child. In spite of knowing that, Marie Curie did not lose hope and she continued to study. She mastered Physics in the University of Paris.

The officials of the University of Paris hired her as a professor in Physics in 1906. There she discovered Polonium and Radium elements and continued her research in radiation.

R. Praneeth X - A

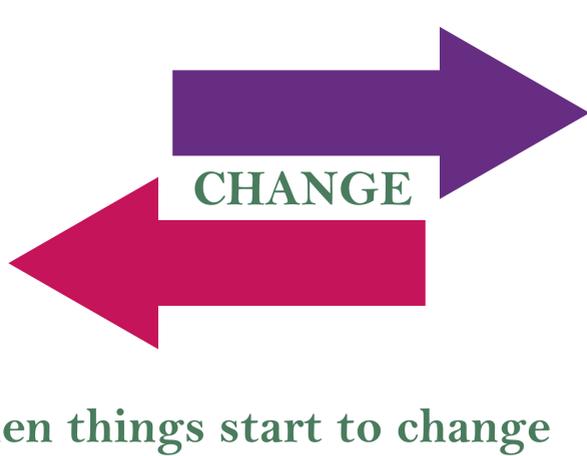

I think life is like a game because you cannot get to the top without planning things. There are challenges everywhere in life but if I believe, I can get past them. It takes confidence and patience to get what I want. Challenges are there to make life more exciting because sometimes it means I should try something I have never done before.

In a game of chess, each piece I play, I think about the next move before it is my turn, just like that, in real life too, I must plan ahead to stay on the top. My opponent's moves are unknown just like my future is because I do not know if it will change. A good game takes a few hours but a well developed plan can take years.

Time is always there for me to use but chances do not come by more than once. Sometimes in a game, my opponent puts me at a dead end but there is always a way out if I look close enough. In life sometimes I need to gamble with my chances because the result is unexpected. Life and game are similar which is why if I can win a game then I can get through life.

Nathaniel Francis X - D

When things start to change

"Memories are the most precious treasures of our lives."

I never really understood the true meaning of this phrase until 19th May, 2022, as that was when everything started to change.

Being one of the 189 students who had given the ICSE board examination as the first batch of St. Patrick's High School, 19 May, 2022 was when we wrote our last exam. It was also the day when I saw all my friends gathered together for the last time.

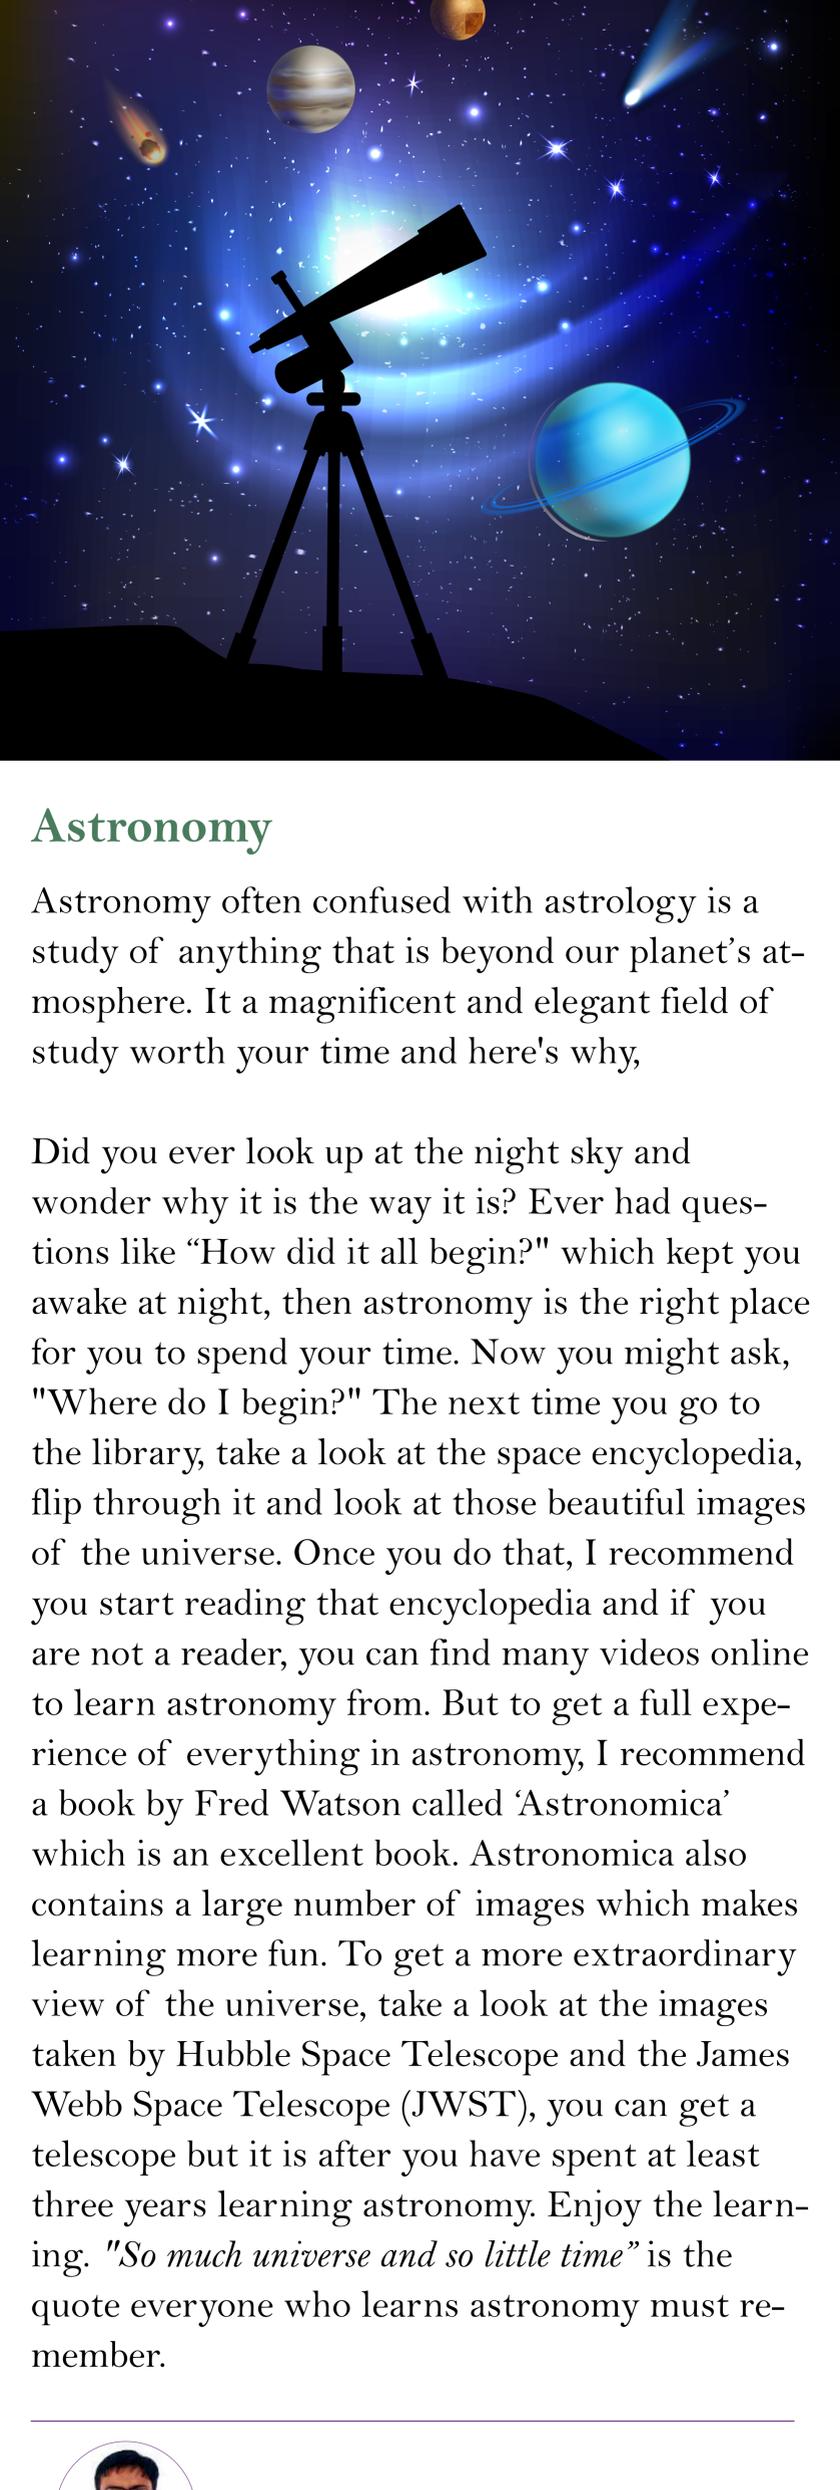

Whilst all my friends had decided to walk new paths in their lives, I decided to stay in the place which is accountable for all the memories I have confined in the depths of my heart i.e., St. Patrick's High School.

Continuing to study in St. Patrick's High School ISC, every inch and square of the school reminded me of all the thrilling, fun-filled, sweet and undying memories I had stored in my heart.

Through this article of mine, I would like to convey a message to each and every student of this school (especially 10th class students) that this is the time, Live every moment, make a whole lot of memories with everyone around you, for it will not last forever. And there shall come a time, when everything starts to change.

Astronomy

Astronomy often confused with astrology is a study of anything that is beyond our planet's atmosphere. It a magnificent and elegant field of study worth your time and here's why,

Did you ever look up at the night sky and wonder why it is the way it is? Ever had questions like "How did it all begin?" which kept you awake at night, then astronomy is the right place for you to spend your time. Now you might ask, "Where do I begin?" The next time you go to the library, take a look at the space encyclopedia, flip through it and look at those beautiful images of the universe. Once you do that, I recommend you start reading that encyclopedia and if you are not a reader, you can find many videos online to learn astronomy from. But to get a full experience of everything in astronomy, I recommend a book by Fred Watson called 'Astronomica' which is an excellent book. Astronomica also contains a large number of images which makes learning more fun. To get a more extraordinary view of the universe, take a look at the images taken by Hubble Space Telescope and the James Webb Space Telescope (JWST), you can get a telescope but it is after you have spent at least three years learning astronomy. Enjoy the learning. *"So much universe and so little time"* is the quote everyone who learns astronomy must remember.

Life of a teenager

Teenage starts from the age of 13 to 19. 'Irresponsible and immature,' that is how most people would define a teenager of the present day. What causes this stereotype? Not all teenagers are reckless in fact they are engaged in discovering new aspects and also themselves. We are too old to be treated as children.

Anxiety, depression, stress, bullying are major problems a teenager usually faces. Sometimes, we do need a well-wisher who can be our friend, take the place of our parents or siblings. Raising a teenager is hard. Parents play a vital role in every teenager's life. Bad influence, addiction to social media, bad habits, electronic devices etc., are some of the major distractions in the life of a teenager.

Healthy social life, focus on education and communication skills, a positive outlook, providing a platform and encouraging teenagers on the basis of their interests may lead to the making of successful and good teenagers. Many teenagers see life as something that's about to begin. A teenager's life is about the hope and optimism, prosperity, passion, positive relationships and perfect happiness. Emotional ups and downs are a part of life for young people. It is normal, for a teenager to be cheerful, excited, down or sad at the same time.

It is also normal for a teenager to want more privacy, to be on their own, make decisions etc. Understanding a teenager is also important at the same time.

K. Eshwari XI - MPC

Mom

What is the reason, Mom?
Every time when I get hurt, you feel the pain,
Whenever I feel lonely, you are beside me,
When I feel broken, you heal and fill my heart
with smiles and happiness.

What is the reason, Mom?

How is it possible Mom?
Though you suffer pain, you never let me know,
You hide your tears for my happiness,
You leave your pleasures for my joys,
You work every time to relieve my stress,
How is it possible Mom?

Thank you, Mom
For supporting my ambitions,
For encouraging my dreams,
For truly believing in me and in my dreams.
Your love is infinite with happy memories you
have given me,
Thank you, Mom...

R. Bhargav XI MPC

Dad

I observed you many times Dad,
You hide your tears for the family's happiness,
You strengthen yourself to fight with the world
for us,
You forget yourself and think about us every
time,
You have a lot of emotions but never show it.

Oh, Dad you're a fighter,
You fight with yourself to work for the family,
You fight with everyone to solve any family
problem,
You fight with the whole world to keep us safe,
You are my fighter, Dad.

My strong Dad,
I'm proud to be your son which is a great bless-
ing for me in this life,
Thank you, Dad, for everything...

R. Bhargav XI MPC

Failure

Failure is the penalty for continuously getting
things wrong. Success on the other hand is the
reward for getting things continuously right.
Failure puts you down in despair, success sends
you soaring among the clouds. Therefore, I look
at myself and wonder am I a success or failure.
Then may be I am a bit of both.

Syed Rehan XI MPC

The end of one journey but the beginning of another

The quote, *"The roots of education are bitter, but the fruit is sweet,"* by Aristotle describes best a student's school life where at first the demands of education seem to be burdening but with the guidance of our teachers, one can scale the highest peak however difficult the climb might be.

Schools are temples of learning where students are nurtured to bring fruit through the seemingly bitter roots of education and where character building and life-building values are imparted.

This year marked the end of an important phase in my life, a phase which is none other than the end of school life. School life and its memories are something that is cherished for long. It has been a great blessing for me to spend the last phase of school life at St Patrick's even though there was a brief interruption by the pandemic. Our batch was able to enjoy and learn to the fullest during our time in school. It was my pleasure to be a part of the first ICSE batch of our school and we were fortunate to be guided by our teachers through the medium of online classes during the pandemic. We were taught to the full extent and never lagged behind. Looking back, I am really glad for the opportunity to study in such a school with a friendly environment. But now as one journey ends, a new one begins. My journey as a college student has begun and I am happy to have continued my higher studies in St. Patrick's School and I hope we students develop as better people with the knowledge being imparted to us at this crucial stage in our life.

Samuel Rao XI - MBiPC

नित आगे तुम बढ़ना सीखो

खुद पर इतना विश्वास करो,
अर्जुन-सा शर संधान करो
परिस्थिति जैसी हो, जो भी हो
जीवन जैसा हो, जो भी हो

अपनी जिद पर अड़ना सीखो।
नित आगे तुम बढ़ना सीखो॥

घनघोर घटा गड़-गड़ गरजे
दामिनी नभ में चम-चम चमके
विघ्नों से हार न मानो तुम
मन में अब ऐसा ठानो तुम

उर में धीरज धरना सीखो।
नित आगे तुम बढ़ना सीखो॥

पथ में काँटे जितने आएँ
कदम न कभी रुकने पाएँ
दिन में सपने अब देखो तुम
होंगे पूरे यह मानो तुम

बस कमियों से लड़ना सीखो।
नित आगे तुम बढ़ना सीखो॥

बस लगातार प्रयास करो,
अपने ऊपर विश्वास करो
ईश्वर का वरदान हो तुम
वीरों की संतान हो तुम

बस पर्वत पर चढ़ना सीखो।
नित आगे तुम बढ़ना सीखो॥

सोचो जरा...

सोचो .जरा क्या हो अगर...

नेत्र हो पर दृष्टि नहीं,
ज्ञान हो पर विवेक नहीं,
व्यक्ति हो पर चरित्र नहीं,
हृदय हो पर दया नहीं,
प्रेम हो पर रीति नहीं,
मानव हो पर मानवता नहीं,
अपने हों पर अपनत्व नहीं,
धर्म हो पर सत्कर्म नहीं,
जीवन हो पर जीवंतता नहीं,

सच में अगर ऐसा हो तो क्या होगा?.

नेत्र नासूर बन जाएगा,
ज्ञान अनाचार बन जाएगा,
व्यक्ति पशु बन जाएगा,
हृदय पत्थर बन जाएगा,
प्रेम पाप बन जाएगा,
मानव दानव बन जाएगा,
अपना पराया बन जाएगा,
धर्म धंधा बन जाएगा,
जीवन नरक बन जाएगा,

क्या ऐसा होने लगा है?..

सोचो जरा..

क्या ऐसा नहीं हो रहा है ?..

सोचो जरा...

గురువు

నా గురువు

పూర్వ కాలంలో మనదేశంలో గురువుకు ఇంత గౌరవం ఉండేదనీ, నేటి కాలంలో ఉపాధ్యాయుడు, విద్యార్థి ఇద్దరూ మారారు. పూర్వ కాలంలో అధ్యాపక వృత్తి ఒక వృత్తిగా కాకుండా ఉత్సాహంగా, అభిరుచిగా ఉండేది, కానీ ఇప్పుడు అది జీవనోపాధికి సాధనంగా మారింది. కానీ ప్రతిదీ ఇంకా ముగియలేదని నేను అనుకుంటున్నాను. ఉపాధ్యాయ దినోత్సవాన్ని జరుపుకుంటున్న విద్యార్థులను చూసినప్పుడల్లా, నేను చాలా భావోద్వేగానికి గురవుతాను మరియు అదే సమయంలో చాలా సంతోషంగా ఉంటాను. ఇదంతా చూస్తుంటే మన హృదయాల్లో ఇప్పటికీ ఉపాధ్యాయులకు ప్రత్యేక స్థానం ఉందనిపిస్తోంది.

పాఠశాలలో చేరిన మొదటి రోజు నుండి కళాశాల చివరి రోజు వరకు అతను మనకు చదువు చెబుతాడు, మనలోని లోటుపాట్లను కనిపెట్టాడు మరియు చదువును అందిస్తున్నాడు అనే వాస్తవాన్ని ఎవరూ కాదనలేరు. ఇది కాకుండా, అతను మన వ్యక్తిత్వాన్ని కూడా సృష్టిస్తాడు, సంక్షిప్తంగా, అతను మన భవిష్యత్తును సృష్టిస్తాడు.

ఉపాధ్యాయులు మన భవిష్యత్తు నిర్మాతలు

సరే, మన హృదయంలో ప్రత్యేక స్థానం ఉన్న అనేక సంబంధాలు ఉన్నాయి మరియు వాటిలో ఒకటి మనకు అత్యంత ప్రിയమైన గురువు అని నేను నమ్ముతున్నాను. ముఖ్యంగా మనతో కఠినంగా ప్రవర్తించిన వారు మరియు మన తప్పులకు శిక్షించే వారు.

ఈ ద్వేషం మనం పెరిగేకొద్దీ ప్రేమగా మారుతుంది, ఎందుకంటే మన వృత్తిలో తిట్టడం యొక్క ప్రాముఖ్యతను మనం గ్రహించాము. కబీర్ దాస్ ఈ క్రింది పంక్తులలో గురువు యొక్క పనిని చాలా చక్కగా వివరించారు.

"గురు కుమ్మరి షిస్ కుంభ్, గర్వి గర్వి కదై ఖోత్, లోపలి చేయి సహాయం, బయట గాయపడింది"

పై పంక్తులలో కబీర్ దాస్ జీ మాట్లాడుతూ, ఉపాధ్యాయుడు కుమ్మరి లాంటివాడని, విద్యార్థి తాను చేసిన నీటి కుండ లాంటివాడని, దాని నిర్మాణంలో అతను బయటి నుండి కాదను కొట్టాడు మరియు అదే సమయంలో దానికి మద్దతుగా ఉంటాడు. అతను కూడా ఒక చేతిని లోపల ఉంచుతుంది.

అందుకే నాకు మా టీచర్ అంటే చాలా ఇష్టం . నా భవిష్యత్తును నిర్మించాల్సిన బాధ్యత ఆయనదే.

ముగింపు

కాబట్టి మీరు మీ కఠినమైన ఉపాధ్యాయుల మాటల గురించి కూడా బాధపడకూడదు, ఎందుకంటే వారు మిమ్మల్ని మీరు కోరుకునేలా చేస్తారు. మరో మాటలో చెప్పాలంటే, అతను మీ భవిష్యత్తును నిర్మించేవాడు.

అంతర్జాతీయ శాంతి దినోత్సవం

అంతర్జాతీయ శాంతి దినోత్సవాన్ని ప్రపంచ దేశాలన్నీ ప్రతి సంవత్సరం సెప్టెంబర్ 21న

జరుపుకుంటాయి. అంతర్జాతీయంగా కాల్పుల విరమణ, అహింస, శాంతి సోదర భావాల సాధన కోసం ఐక్యరాజ్యసమితి ఈ దినోత్సవాన్ని నిర్వహిస్తున్నది. దీనిని ప్రజలు 24 గంటల పాటు అహింస మరియు కాల్పుల విరమణను పాటించడం ద్వారా జరుపుకుంటారు.

సమాజంలో అభివృద్ధి మరియు శ్రేయస్సు తీసుకురావడానికి మనం ఎంచుకునే మార్గం శాంతి. ప్రజల్లో శాంతి సామరస్యం లేకపోతే ఆర్థిక స్థిరత్వము, సాంస్కృతిక ఎదుగుదల అసాధ్యం. మనం శాంతి భావనను ఇతరులకు చెప్పే ముందు మనలో శాంతిని కలిగి ఉండటం చాలా అవసరం. శాంతి భద్రతలను కాపాడడం ప్రతి ఒక్కరి కర్తవ్యం.

Events

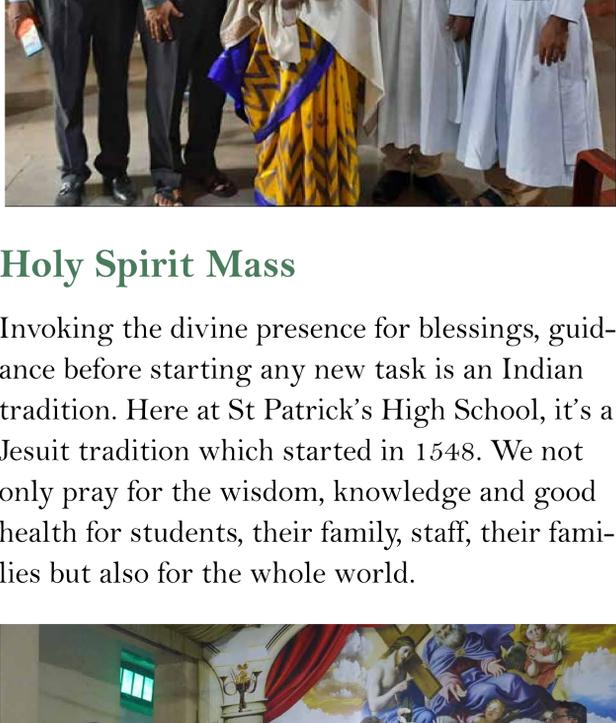

Workshop and Seminars for teachers for the academic year 2022-23 according to the changing dynamics.

Renowned speakers from the education field were invited, who shared their valuable insights and groomed the teaching faculty of St Patrick's High School to adapt better than before keeping in mind the current student requirements and also the Jesuit mission.

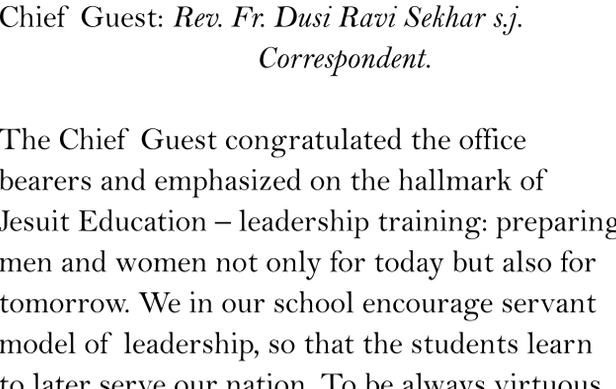

1st June 2022 - Retirement – Ms. Manoranjani Joseph

Manoranjani teacher is fondly called as Manu teacher not just by her colleagues but also by the students. She is known for her melodious singing and under her able guidance the school choir had won many competitions.

Holy Spirit Mass

Invoking the divine presence for blessings, guidance before starting any new task is an Indian tradition. Here at St Patrick's High School, it's a Jesuit tradition which started in 1548. We not only pray for the wisdom, knowledge and good health for students, their family, staff, their families but also for the whole world.

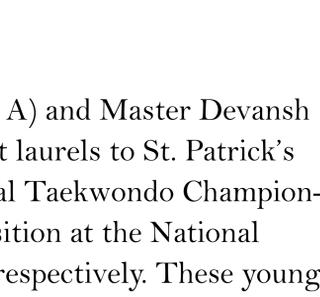

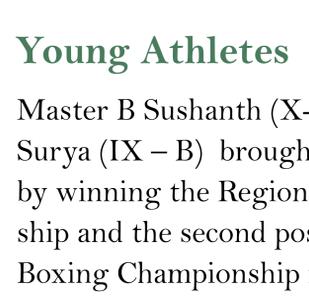

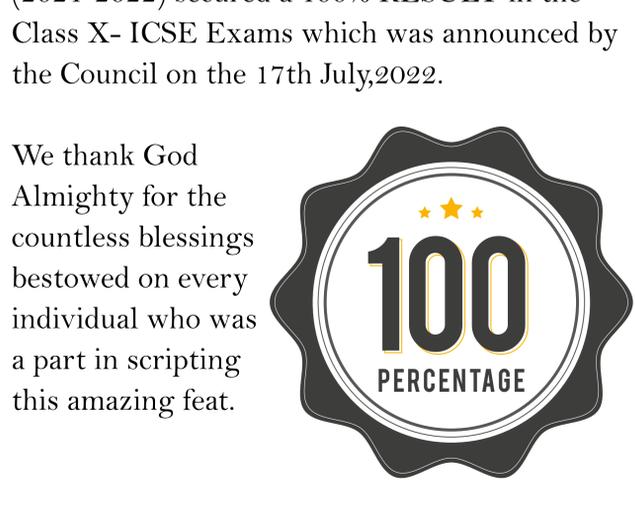

Investiture Ceremony

Investiture Ceremony of School Cabinet for 2022-2023

Chief Guest: *Rev. Fr. Dusi Ravi Sekhar s.j. Correspondent.*

The Chief Guest congratulated the office bearers and emphasized on the hallmark of Jesuit Education – leadership training: preparing men and women not only for today but also for tomorrow. We in our school encourage servant model of leadership, so that the students learn to later serve our nation. To be always virtuous, and truthful labouring to keep the flag of St. Patrick's flying high.

17th July, 2022

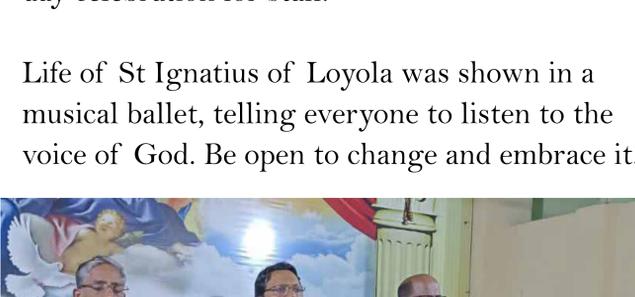

Fruits of hard work and labour of our students, their parents, teaching staff and the entire management who worked under the meticulous planner, Rev. Fr. A. Elango s.j., Principal, was paid when the **FIRST BATCH** of STUDENTS (2021-2022) secured a **100% RESULT** in the Class X- ICSE Exams which was announced by the Council on the 17th July,2022.

We thank God Almighty for the countless blessings bestowed on every individual who was a part in scripting this amazing feat.

Young Athletes

Master B Sushanth (X- A) and Master Devansh Surya (IX – B) brought laurels to St. Patrick's by winning the Regional Taekwondo Championship and the second position at the National Boxing Championship respectively. These young dedicated athletes aspire to represent India in the future.

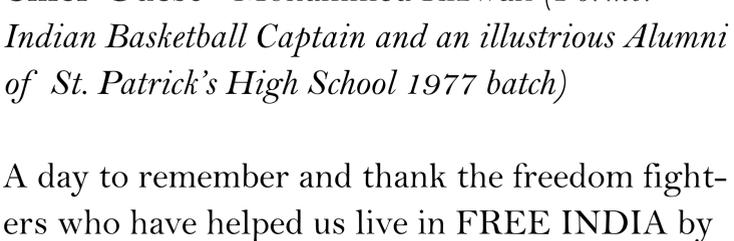

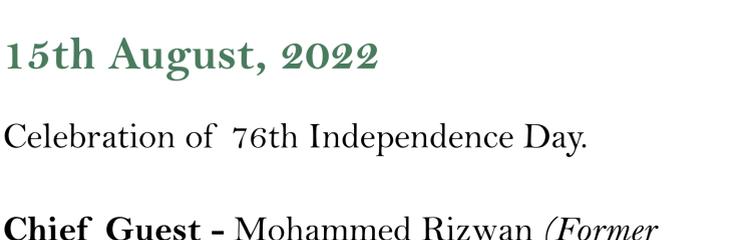

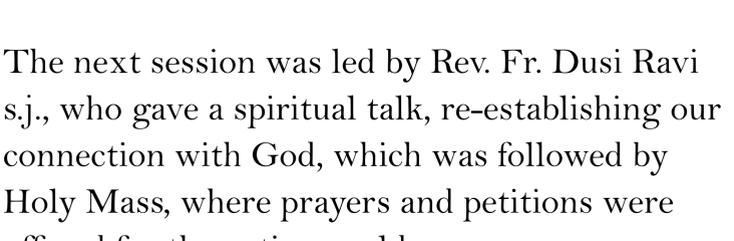

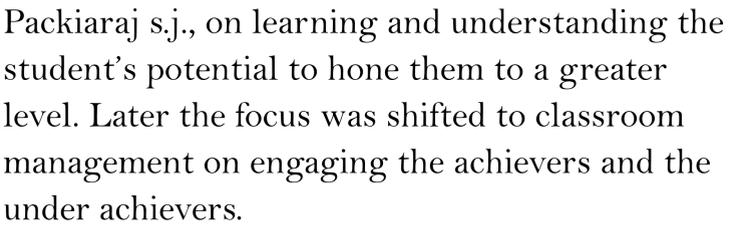

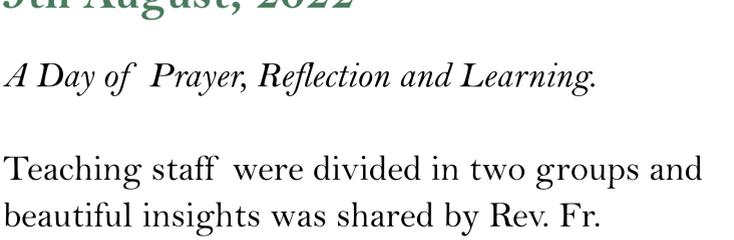

30th July, 2022

The 500th Year of The Cannonball Experience and Conversion of St. Ignatius of Loyola feast day celebration for staff.

Life of St Ignatius of Loyola was shown in a musical ballet, telling everyone to listen to the voice of God. Be open to change and embrace it.

ECA – Extra Curricular Activities

Extra curricular activities at St Patrick's High School has become a part of student life. Young minds explore the opportunities provided to them and ace them. They not just compete but also help each other and grow in a healthy environment.

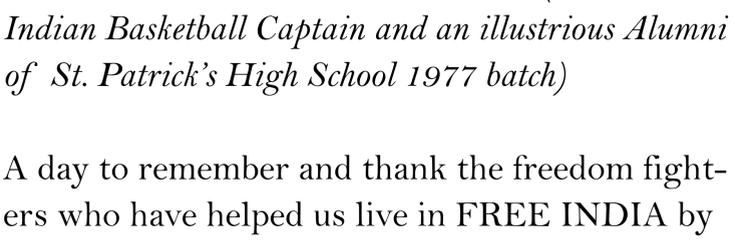

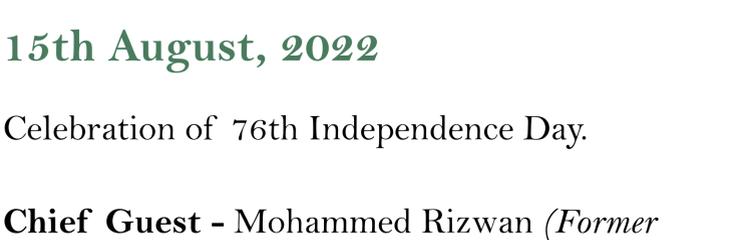

9th August, 2022

A Day of Prayer, Reflection and Learning.

Teaching staff were divided in two groups and beautiful insights was shared by Rev. Fr. Packiaraj s.j., on learning and understanding the student's potential to hone them to a greater level. Later the focus was shifted to classroom management on engaging the achievers and the under achievers.

The next session was led by Rev. Fr. Dusi Ravi s.j., who gave a spiritual talk, re-establishing our connection with God, which was followed by Holy Mass, where prayers and petitions were offered for the entire world.

15th August, 2022

Celebration of 76th Independence Day.

Chief Guest - Mohammed Rizwan (*Former Indian Basketball Captain and an illustrious Alumni of St. Patrick's High School 1977 batch*)

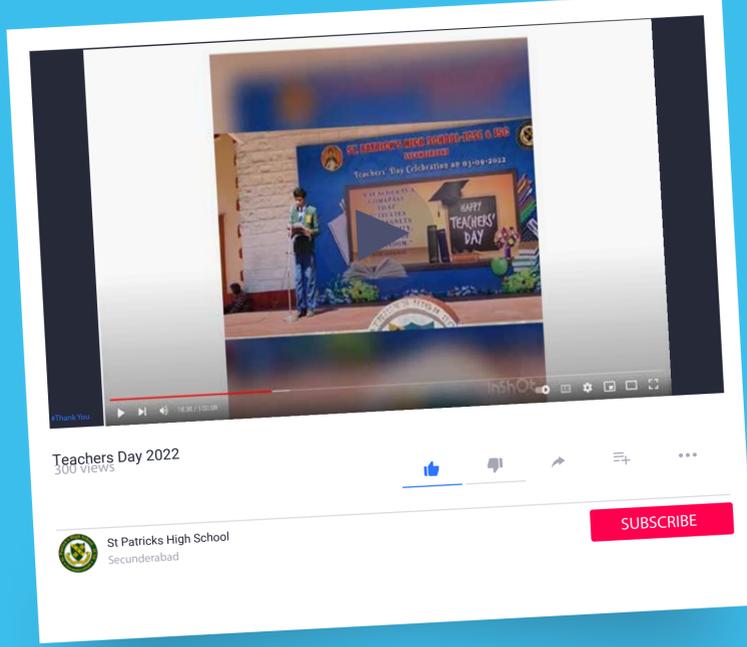

A day to remember and thank the freedom fighters who have helped us live in FREE INDIA by having a cultural extravaganza.

3rd September 2022

Teachers Day Celebration

A day to celebrate and show gratitude for the efforts and services rendered by the teachers. Students expressed their gratitude and appreciation for their teachers on this day collaborating, cooperating and putting up a colourful program.

25th September, 2022

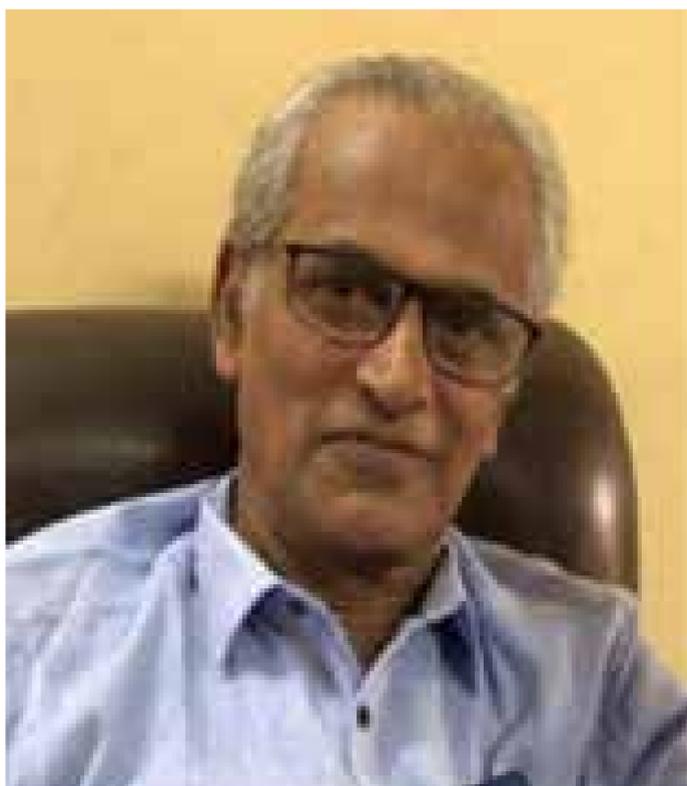

“It is not how much we give, but how much love we put into giving” Mother Teresa.

A visit to Mother Teresa’s Home for the Destitute, Special children run by Missionaries of Charity sisters was possible because of you dear parents and students. It was your generous contribution both in cash and kind towards Community Service- Good Samaritan.

The amount collected was handed over to the Superior, in the presence of students and staff.

Obituary

Fr. Mark Kulandai Raj s.j.,
died on 4th July, 2022.

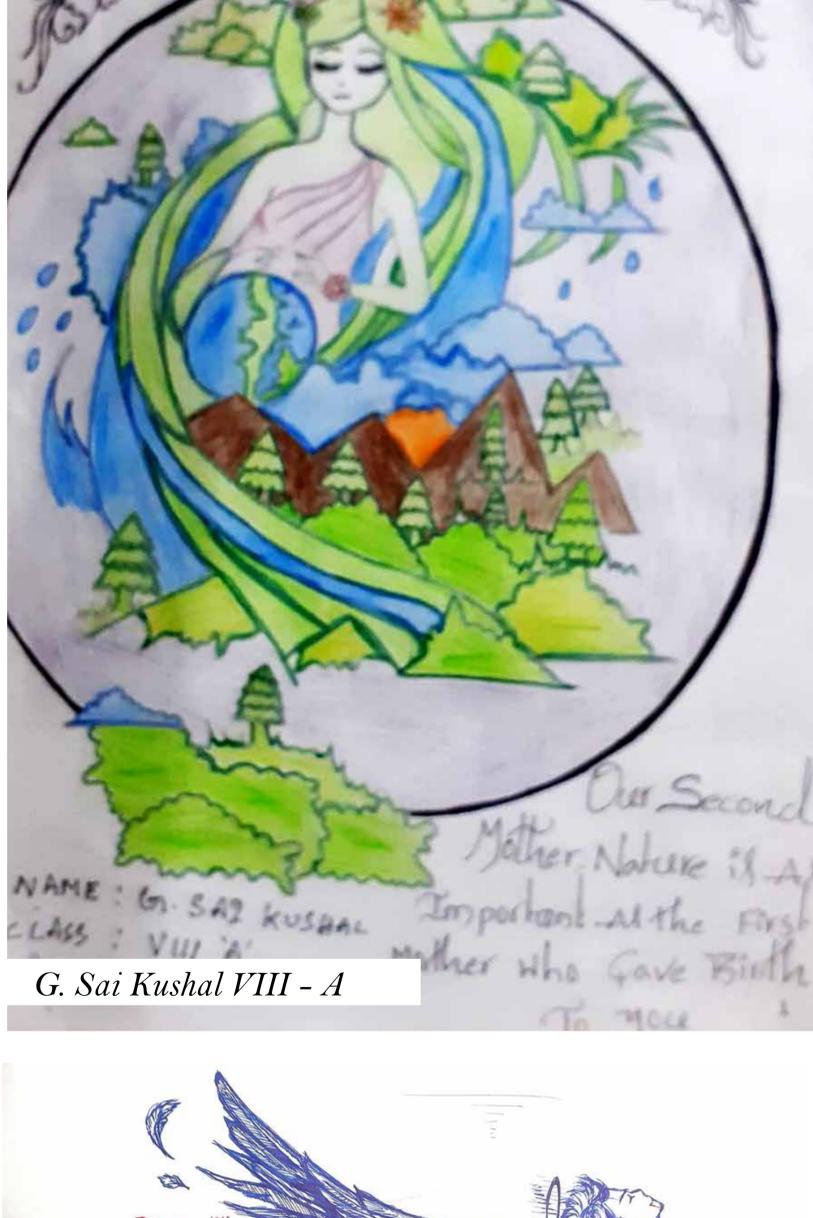

He was a Counsellor and Spiritual Director and also known for being artistic, creative and friendly.

Conclusion

‘Where there is a will, there is a way.’

One of the most famous proverbs and my favourite one too. I believe that if you make up your mind to do something then nobody can stop you from achieving your goals. If there's anyone stopping you than that's no one else but YOU.

Let us face the situation that life throws in our face and always remember that life doesn't come with a rule book, but I believe that there is a solution for every problem.

So, stop making those excuses about the pandemic, no stock of books, cold, fever, rain, etc., and make way for your own progress.

Since, time and tide waits for none, we have to make hay when the sun shines! Dear students, this is your time to enjoy, grow, learn, make mistakes, rectify them, practice a hobby. The sky is the limit!

So, what are you waiting for? Wake up and reach for the stars! They are yours to grab. As each one you is a star, shining brighter each day as you learn to be a disciplined and responsible citizen of the world. So, make way for your **SUCCESS.**
