

Chronicles of St. Patrick's High School- January 2024

PRINCIPAL'S MESSAGE

Hello Readers,

February 11, 2024, a very important Sunday - World Day of the Sick. We celebrate the feast of Our Lady of Lourdes in France. Thousands of people come here to get healed from their ailments. I had been to this famous place in 2019, joined lakhs of people and prayed for the stakeholders of St. Patrick's Family and continue to pray for our good health without ceasing. 'Health is wealth.' We need to invest an hour to take care of our body and our body will take care of the remaining twenty-three hours.

The present issue is the fruit of our high school students and staff. We are trying to reach out to our parents and students through our website. Our aim is to provide an opportunity for our students to showcase their talents in every possible way so that our students train their minds to think. "The pen is mightier than the sword" is an old adage and we encourage more and more students to think critically, read well and write richly.

In this current edition, you can read the poem by Master Mohammed Anas Ahmed Khan of 12th grade, this poem was composed into a song. About 325 students danced to this song and St. Patrick's School showed the way on January 24, 2024 at the 66th Annual Conference of ASISC (Association of Schools of Indian School Certificate) which was held in Hyderabad. 2900 Principals attended the conference on January 24th to witness the programme.

In our School, we train the mind to think. Training in critical thinking orientates our students to make a difference in life. There are many salient features that are followed in St. Patrick's School to sharpen the mind, polish the expression and bring out their originality. Our school systematically teaches writing skills during the foundation year to develop not only better communication skills but also to develop the faculty of critical thinking, reading, writing etc. Here comes the fruit of our school students that showcases "Reading, Writing and Thinking."

Regards,

Elango, SJ.

Principal

FROM THE EDITOR'S DESK

Proverbs have been part and parcel of our life from childhood. Heard the proverb 'You are never too old to learn.' What does it mean? Age is not a barrier when one wants to learn new skills, enjoy new experiences or learn new things. All it requires is a curious and an open mind to learn.

Now another proverb, 'You cannot teach an old dog new tricks.' Now what does this mean? This means that there is a limit to an individual's ability to learn or change particularly as they get older.

Often in life we come across such contradictory sayings/proverbs and we are in a dilemma. Those who wish to change will certainly choose the first proverb and those who want to find excuses not to change, I'm sure will choose the second one.

As we come to a close of the academic year, we have to learn, unlearn and relearn. Unless we do this, we can never progress in life. As students, educators and parents it is our duty to evolve as a better person every day. We can surely do it. For success has no excuses, only failure does.

To conclude, a few more contradictory proverbs, 'Haste makes waste.' 'Time waits for no one.' 'Life doesn't give a second chance.' 'Everyone deserves a second chance.' Contradictory, isn't it? Well let's think about it

THE ART OF MUSIC

Music has been hailed as 'the universal language of mankind.' It serves as a form of expression for everyone all around the world. From classical symphonies to metal pop, music has always been a reflection of human experiences.

The origin of music has always been a mystery to the world. However, the credit for the invention of music is given to the Biblical Jubal. Music has undergone a remarkable evolution throughout human history, highlighting cultural and traditional changes. From the simple beats of ancient civilization to the rise of the most amazing artists like Beethoven, Mozart, Paganini etc. Moving forward to the 20th and 21st century, artists like Beatles, Queen, Michael Jackson, Eagles, Beyonce, Taylor Swift, Ed Sheeran, etc. had taken over the world.

Music is ever-changing. Through the years, there have been different styles and genres of music, ranging from the softest ballad to the hardest metal.

Besides entertainment, music also gives comfort as it provides therapeutic feelings and peace. Music is not merely a combination of sounds but also a reflection of human emotion and experience.

David R. Vanlalpeka [VIII A]

From Mizoram to Hyderabad

I come from Mizoram, a hill station in north-east India, its capital is Aizawl. It is known as the 'Silent City' of India because there is no sound of horns and no breaking of traffic rules. The most favourable time to visit is during Christmas. The streets are decorated with different themes in different parts of the city. It is quite cold and there is fog in the morning. I miss spending Christmas in Aizawl which includes family gatherings, exchange of gifts and a grand feast in the Church.

After our family moved to Bangalore, I joined a new school and made some new friends. My time in Bangalore was short but nice. Due to my father's work, we again moved from Bangalore to Hyderabad. Being the first Mizo student in St. Patrick's, some students would call me Chinese, which I was not happy with. However, some of my close friends would defend me by telling them that I am an Indian too.

My school life in Hyderabad is quite exciting. We have hard-working teachers who explain the lessons in a way that makes the topic interesting. We have a big class room with advanced technology. I also enjoy talking and playing during my free time. One of my favourite periods is PT, where I can play and enjoy the free time that I have with my friends.

I enjoy my time at school. I feel fortunate to go to an amazing and prestigious school - St. Patrick's School.

David R. Vanlalpeka [VIII A]

IN LOVING MEMORY OF MY GRANDMOTHER

I want to talk to you nonstop,
As if my sentences never had a full stop.
I want to see your beautiful face,
and hear your voice again.
I want to hug you tight,
And never let you out of my sight.
I just want to be with you from dusk till dawn,
But now you have just gone.
You vanished like the cool breeze,
That I cannot catch or freeze.
You are now like the star in the sky,
That I can never reach.
Alas! Our journey ended very soon,
You are now as far as the moon.
I wish you could stay,
And never go away.

Jeremy Rayan Robert
[Class VIII-D]

My new school St. Patrick's High School

Here it is:

As I entered the school on the first day for admission. It was the day when everyone was writing their entrance exam to qualify. My parents and I went straight to the Principal. He asked if I would write the exam, I nervously said yes and wrote it.

When the results came, I surprisingly passed. I thought I wouldn't because I had studied in a CBSE school earlier.

On the reopening day, which was my first day, I was very nervous. As I entered the class, my classmates welcomed me warmly and invited me to sit with them. I pretty much came to like the school as my classmates treated me in a friendly way. Coming to the teachers, some asked me about my earlier school and how I felt being in St. Patrick's. When I came to know there was only one physical education class per week I was pretty sad, as I had three in my old school.

About the exams and unit tests, I was surprised with my results as I secured good marks in almost all subjects but not so good in English language, as I used to get 45 and above out of 50 in my previous school. I actually felt ICSE is easier than CBSE.

I made many good friends who support me.

Krishna Teja D [VIII-E]

ARE YOU ACCOUNTABLE?

What do you do when opportunity comes knocking on your door? Yes! You grab it and not let it pass. I can very confidently say that we as a class were lucky to get the chance for our class assembly where we were given the golden opportunity to express ourselves, independently. Now, that's where I would like to draw your attention. Our class teacher trusted us. She identified our abilities and just said, 'You can do it.'

A bunch of teenagers, with different mind sets and thought process had to come together to work as a team. Fortunately, we were all like-minded young individuals who wanted a chance to demonstrate and present ourselves, and not be an embarrassment, also not let that trust of our teacher go down in vain. So, our teacher gave us our theme which was 'Self-discipline.' For a teenager it is a huge task as it is time and again proven that teenagers break all the rules and are known to challenge their elders, question them for every task that is given.... The list is never ending. Working together as team on a topic like that, to set an example for our peer groups and juniors wasn't difficult as we had our teacher guiding us on a timely basis, as and when we approached her. As a class, I must say we did an awesome job and made our teacher proud. We presented team work, coordination, and a little bit of entertainment so that we had the audience grooving to our beats.

I must say, the class assembly is an amazing routine which is followed in our school campus where every class is given a chance to present their ideas, thoughts through skit, dance, speech etc. It actually helps the students to get over their performance anxiety and builds their confidence and helps boost leadership. Above all, every student gets an opportunity to perform, to communicate and to be expressive.

Shrosi Aloysious Marian [IX -D]

My Teacher

A teacher plays a huge role in a student's life. They are like a potter who mould us, students. They are like blacksmiths, moulding us into lamps, so that we may shine in this world. Many great poets have written about the importance of a teacher and how should a teacher be as they are the ones that lead us to God.

My English teacher has influenced my life and the lives of others in a positive way. My teacher helped us to be better than who we were yesterday and taught us to try our best no matter what. She taught us the value of education and the importance of English. She helped me understand that life is too short to have arguments. She taught us that sometimes we should put our egos aside and humble ourselves.

My English was never the best. I used to be slack and never paid attention in any of my classes, but my English teacher taught us the importance of education and refined my speaking skills.

One day when I was talking during the English class, she asked me to stop, but I did not and kept talking. She asked me to stand up and said that I needed to put my ego aside if I wanted to grow up and have a successful life.

Teachers play a very important role in our life. My teacher changed me for the better and I respect and thank her for doing so.

Jonathan Edward [X-E]

India Vs England 1st Test Match

Our school, St. Patrick's High School took our School Cricket team and the students of class 10 to Rajiv Gandhi International Stadium for the 1st Test Match between INDIA and ENGLAND on the 3rd day. I was so eager to see the match that I did not sleep that night. The reporting time was 7:45 a.m. but our team was ready by 7:30 a.m. We went to the Stadium by bus. We had a lot of fun in the bus. We were there by 9:45 a.m. but the match had already started. It was a dream come true to watch my favourite players play.

We arrived at the stadium and we got our passes. We got our seats on the first floor. We clicked some pictures for memories while watching the match for the first time in a stadium. As we were late for the match, we missed 5-6 overs. When we entered the stadium, INDIA was batting and got all out and ENGLAND came in to bat.

It was a pleasure to see my favourite players on the field. Some of the players waved at the crowd. They cheered team INDIA when they took a wicket or scored a boundary. Our school and the HCA provided us lunch. They gave 2 Veg Burgers from Burger King. The food items were overpriced. It was fun to watch the match for the first time in the stadium.

I also saw my favourite player, Rohit Sharma. This made that day more special but I was upset that Virat Kohli did not play. My friends bought the Indian team caps, wearing that we felt we were part of the Indian team.

Events like this help the youth get involved in sports activities. During the break we had something to eat and drink. The 3rd day came to an end with England batting. We were requested to leave the stadium. My friends and I came home by metro. We had lots of fun and cracked jokes in the metro. We had an amazing time in the stadium.

M. Aditya Kaustub [IX – E]

Come Learn to Love Nature

Nature, the most precious gem;
The most beautiful among all of them;
It's all around us;
Adversely circulated around us.

It is like the universe;
If we wonder;
It is full of verses;
And to the heart feels tender.

If we feel, it's alive;
It feels melodious and rustling;
If we sense it;
It is like acquiring a new life.

If we dwell in it;
It will swell our hearts;
With all the joys;
That are like toys.

It is a dream land;
Which has come to our land;
It is like a knot;
Untie it if you have not.

EDUCATION WITHOUT MORAL VALUES IS INCOMPLETE

“Education without morals is like a ship without a compass, merely wandering nowhere”

- Martin Luther King.

Education plays an important role in the life of every individual. An educated man is full of knowledge. A knowledgeable man is sure to lead a well settled life.

In our daily life, we come across many educated people but keen observation reveals that not all of them are civilized. This is due to the absence of moral values. The moral values should be taught at the right age. If a young child is given guidance towards what is right, he/she will definitely serve his country as a good, civilized citizen. As our former President rightly said, “It is a mother and a primary school teacher who can sculpt a child into a perfect citizen”.

Education these days is mere learning. It is exam oriented. Hence, there is no place for moral values. It should never be forgotten that it is value education that leads to wisdom. Very few people understand the difference between knowledge and knowledge combined with values. Knowledge is the accumulation of information whereas wisdom is understanding values.

Maturity and wisdom, which are essential parts of development, can only be achieved by education embedded with values. The father of our nation, Gandhiji said, “Business without principles and education without morals will never last long.” People without values can never succeed in serving their country.

“What is the use of an arrogant scholar,
Who earns thousands of dollars,
Who is never good and never cares,
But only thinks of money and chairs”

Education without values can never be complete as it cannot build one’s character. Education is not just academics, it is about values and ethics.

“Educating the mind without educating the heart is no education at all” – Aristotle.

16 POINT FORMULA TO BE AN IDEAL STUDENT

- RESPECT: Respect your teachers, parents and elders.
- LOVE: Love your country, your culture and your ancestors.
- SERVICE: Serve the poor, the illiterate and the sick.
- SELF DISCIPLINE: Discipline your body, your senses and your mind.
- SELF CONTROL: Control your words, your thoughts and your actions.
- FAITH: Have faith in yourself, in others and in God.
- DISCRIMINATION: Discriminate between good and bad, real and unreal and vice and virtue.
- CONCENTRATION: Concentrate whole heartedly while studying, working or praying.
- TRUTHFULNESS: Be truthful in words, thoughts and actions.
- HARDWORK: Work hard to acquire knowledge, skills and wisdom.
- STRENGTH: Be strong physically, mentally, morally, intellectually and spiritually.
- CONVICTION: Have conviction in the power of goodness, purity and honesty.
- DEVOTION: Have devotion for duty, holy people and God.
- HABITS: Cultivate regular habits of prayer, reading, and meditation, inspiring and strengthening literature.
- SAME – SIGHTEDNESS: Feel the presence of the divine in all beings and treat them equally.
- FIRM DETERMINATION: Have firm determination and strong will power to cultivate good habits in order to achieve permanent happiness, peace, success and fulfilment in life.

ADITYA.S [Class - X E]

WHEN ONE JOURNEY ENDS ANOTHER BEGINS!!

Life and time are not static. Hence, all things associated with life and time are variables. Everything changes giving place to new things. These changes are always beneficial for human beings. Therefore, it should be accepted open heartedly. Failure, downfall, loss, sorrow, suffering, calamities are not the end of life. All these are signals which show us the right path, following which we can attain success, in our life. Life – another name for continuous efforts. When one journey ends, we start planning for another. Life itself is a journey. When the journey of childhood ends, the journey of youth begins, as the journey of youth ends, the journey of old age begins, while the journey of old age ends, the journey of death begins, the journey of death ends and the journey of rebirth begins. Life is a journey that never ends. So, if hurdles come your way they must be considered as stations, where we can take rest for some time and continue our journey.

Y. Mani Venkat [X A]

Artificial Intelligence

Artificial intelligence is a word that stuns people the first time they ever hear it. It is something that occurs naturally. Everything changed in the 21st century as companies and billionaires started investing money into it. While some despised it, others were fascinated by it. As of twenty-twenty three, there are tens of thousands of artificial intelligent bots all over the Internet.

The question arises how Artificial Intelligence is actually brought into existence. The answer is programming and also coding. Artificial Intelligence exists in many forms, such as the app on our phone or the website or our favourite search engine or even in an actual physical form, that is a robot.

The current form of Artificial Intelligence, which is the most used one is the type known as a chatbot. These chat bots are able to do the most ridiculous things. There is a chat bot which can do your homework for you or help you study a tough concept for your class test. There are also a number of bots which can generate art of anything you desire to create. But the good thing is that it doesn't put any artist out of commission. At least not yet.

Recently, the most trending form of this chat bot is the one that is used to generate music by replacing the voice of the singer in the original song with the voice of anyone who has spoken enough and is present in the database of the chat bot. This process is known as sampling. The most viral one is where Prime Minister Narendra Modi sings romantic or hilarious songs.

Moving onto a serious issue, due to how good these bots have become, especially scammers are using the voice and face of famous personalities such as Ratan Tata, Elon Musk and Narayan Murthy to push forward their scams and propagandas. This process is known as Deep fake and it is personally believed by me and many others that is the most dangerous and problematic form of Artificial Intelligence so far.

There are many questions that arise as we think about it, but only time will tell or answer what it can do.

M. Jaya Nischal [Class-XII MPC]

The Rain or the Rainbow

'If you want the rainbow, you've got to put up with the rain.' This phrase serves as a dire warning and also as a statement of encouragement. In life, be it for an exam or a sports match or a job interview, we are often told and advised to prepare and work hard so that we succeed. But the question arises, do we prepare for failure? That is one of the first thoughts that come to my mind when I see the phrase "you've got to put up with the rain." It was mentioned earlier that the statement above serves as a warning. Why is this so? In our life, be it our planning or in setting ambitions, we measure the outcome on the basis of extremes. We either keep on dreaming about the rainbow and forget the rain or we just think about the rain and forget the rainbow. We forget to see the fact that both the rainbow and the rain are dependent on each other. In the same way hardships and success in life are completely dependent on each other. Without hardships success loses its definition and without success, toil and pain lose their value. We look at the rain and the rainbow but we forget the process by which a rainbow is formed?

Coming back to the phrase. We must not fear that our hard work may go in vain. We often forget the one that brings out a rainbow from the rain and that my friend is the sun! The sun is responsible for the rain and the rainbow. The sun in our lives is God. As He is the one who causes us to toil so that we may enjoy the fruits of our labour. The sun is not visible during the rain, but when it is visible, it forms a rainbow. The same applies to us! Facing the rain is not a choice, but when we feel lonely and discouraged and feel that we are lost, we must remember that it is the sunlight that brings out a rainbow from the rain. Though it may seem hidden during the rain, but we have to remember that it is through the rain that He teaches us to see a rainbow.

By,

K Samuel Rao [Class XII MPC]

Conscience

Have you ever wondered when you want to play on the ground, it suddenly starts raining, a voice inside of you tells you, "Please do not go out, you can get a cold." The very thought of eating junk food, a voice arises from within, that warns yet again, "Please do not." This is our conscience.

Conscience is the internal guide, which instructs a person to do good or evil. It acts as an internal 'Alexa' of the mind. Many world-wide scientific researches have taken place. Scientists have put forth many theories, the most popular among them is neuroplasticity. Neuroplasticity is a theory that tells us that our brain and muscles also store information in them. Even when neurons are broken down, their memory remains for a long time and they can grow and advance themselves by training with experience. For example, when a basketball player breaks his ankle, it is a physical problem. When passing the ball the next time, he does not repeat the same because of the memory of the previous injury. The body learns from earlier experiences. So, the ankle aligns itself to prevent injury. This might be the science of conscience, but still the theory has some flaws in it. Everyone has a different take on it. But what I think is, that we can also train our conscience in this way. If our conscience provides us with good and structured decisions, then what about the people who are imprisoned in jails for doing bad things. Does their conscience not warn them? The answer might be Yes or No. I think we have to move on with the approach of training our conscience. It is better to train our conscience to be good.

M.S.Bala Koushik [Class- XII MPC]

TIME MANAGEMENT

Productivity for the overwhelmed!

‘The process of organizing and planning how to divide your time between specific activities is called Time Management.’ It is a crucial skill in both personal and professional life, as effective time management can lead to increased productivity, reduced stress, and the achievement of personal and professional goals.

Some key principles towards time management are:

- Set ‘SMART’ Goals: Ensure your goals are Specific, Measurable, Achievable, Relevant, and Time-bound for better clarity and focus.

SMART is an acronym that represents a framework for setting effective goals. SMART goals are Specific, Measurable, Achievable, Relevant, and Time-bound. Time management is crucial for students for several reasons such as; Academic success, reducing stress, Balancing priorities, Skill development, Effective learning, Meeting long term goals, opportunity for relaxation and self-care.

- Batch Similar Tasks: Group similar activities to minimize transition time and increase overall efficiency.

- Regular Breaks: Schedule short breaks to recharge your energy and maintain concentration throughout the day.

There is a principle named the Pareto's Principle named after the economist Vilfredo Pareto, it specifies that 80% of consequences come from 20% of the causes, asserting an unequal relationship between inputs and outputs. This principle serves as a general reminder that the relationship between inputs and outputs is not balanced. The Pareto's principle, also known as the 80/20 rule, can be applied to various aspects of school life. It manifests in this context in the following ways:

- Study focus: Approximately 80% of your academic success may come from focusing on the most critical 20% of your coursework. Identify key concepts, topics, or subjects that carry the most weight in your grades and prioritize them in your study sessions.

- Time management: Often, 80% of your academic achievements can result from effective time management, concentrating on high-priority tasks. Identify the 20% of activities that contribute the most to your learning and allocate your time accordingly.

- Test preparation: For exams you may find that 80% of the questions or topics come from 20% of the material. Identify and prioritize the most crucial concepts or theories to maximize your preparation efficiently.]

This principle is also applicable to other aspects of student life like, extracurricular activities, social life, projects and assignments, etc.

Another technique for time management is the Pomodoro technique. The Pomodoro Technique is a method based on 25-minute stretches that focuses on work broken by five-minute breaks. Longer breaks, typically 15 to 30 minutes, are taken after four consecutive work intervals. Implementing the Pomodoro technique can enhance concentration, reduce burnout and make study sessions more effective for students. It's a flexible and adaptable method that can be tailored to suit individual preferences and study habits. Some tips to master this technique are;

- Choose your task wisely: Prioritize the tasks that align with your goals and break them into Pomodoro-sized chunks.

- Experiment with session length: Adjust your Pomodoro duration based on the nature of the work. Some find 25 minutes ideal, while others prefer longer or shorter periods.

- Celebrate Pomodoro Victories: Acknowledge and celebrate your accomplishments at the end of each Pomodoro. Small victories contribute to long-term success.

Remember time is your most valuable asset, invest it wisely.

డాక్టర్ భీంరావ్ రాంజీ అంబేడ్కర్

భారతదేశంలో సంపూర్ణ విద్యను పొందిన మొదటి దళితులలో డాక్టర్ బాబాసాహెబ్ అంబేడ్కర్ ఒకరు. పొలిటికల్ సైన్స్, ఎకనామిక్స్, లా లో డిగ్రీ చేశారు. ఆయన గొప్ప న్యాయవాది, రచయిత, చరిత్రకారుడు మరియు గొప్ప రాజకీయ నాయకులలో ఒకరు. ఆయన మధ్యప్రదేశ్ లో జన్మించారు.

ఆయన 1990 ఏప్రిల్ 14న జన్మించారు కాబట్టి ఈ రోజును అంబేడ్కర్ జయంతిగా జరుపుకుంటున్నాం. భీమా భాయ్, రాంజీ మాలోజీ సక్పాల్ ఈ మహా వీరుని తల్లిదండ్రులు. ఇతడు ఎక్కువగా "బాబా సాహెబ్" అని పిలువబడ్డాడు.

అంబేడ్కర్ తన జీవితంలో చాలా అన్యాయాన్ని ఎదుర్కొన్నారు. అతని విద్యా ప్రయాణం ఇతరుల కంటే చాలా సులభం కాదు. స్వాతంత్ర్యానంతరం దళితులను అంటరానివారిగా చూశారు. వారు ప్రతిచోటా చాలా వివక్షను ఎదుర్కొన్నారు. డాక్టర్ బాబా సాహెబ్ అంబేడ్కర్ ముందుకు వచ్చి వారి కోసం పోరాడి దళితులకు ఇతరులతో సమానమైన హక్కులు మరియు స్వేచ్ఛను పొందారు.

గణతంత్ర దినోత్సవానికి బి.ఆర్.అంబేడ్కర్ చేసిన కృషి

1950 జనవరి 26న భారత రాజ్యాంగాన్ని ఆమోదించిన సందర్భంగా గణతంత్ర దినోత్సవం జరుపుకుంటారు. భారతదేశం 1947 లో బ్రిటిష్ రాజ్ నుండి స్వాతంత్ర్యం పొందింది. 1950 జనవరి 26న భారత రాజ్యాంగం అమల్లోకి వచ్చి,

ఆ దేశాన్ని రిపబ్లిక్ గా ప్రకటించి సార్వభౌమ రాజ్యంగా అవతరించింది.

రాజ్యాంగ పరిషత్తు తన మొదటి సమావేశాన్ని 1946 డిసెంబరు 9న నిర్వహించింది.

1949 నవంబరు 26 న మరియు ఒక సంవత్సరం తరువాత రాజ్యాంగం ఆమోదించబడింది. డాక్టర్ బి.ఆర్. అంబేడ్కర్ రాజ్యాంగ ముసాయిదా కమిటీకి నేతృత్వం వహించారు.

అలాగే రాజ్యాంగ దినోత్సవాన్ని కూడా జరుపుకుంటారు.

देश की शान – किसान

किसान देश की आत्मा हैं और उनका योगदान अत्यंत महत्वपूर्ण है। भारत गाँवों का देश है और किसान उसकी शान हैं। वे अपनी मेहनत और उन्नति में लगे रहकर हर समय आपातकाल में भी समर्थ होते हैं। उनका योगदान खाद्य सुरक्षित रखने में अद्भुत है, जिससे देशवासियों को निरंतर आहार प्राप्त होता है।

किसानों की मेहनत न केवल खेती में है, बल्कि उनका संघर्ष भी आपातकालों में सामना करने के लिए हमें प्रेरित करता है। अन्योन्य सहायता और समर्थन के माध्यम से हमें किसानों के प्रति सम्मान दिखाना चाहिए ताकि उन्हें बेहतर जीवन जीने का मौका मिले। उन्हें नए तकनीकी और अनुसंधान के साथ आत्मनिर्भर बनाए रखने के लिए भी समर्थन मिलना चाहिए। इस प्रकार, किसानों के प्रति हमारी कृतज्ञता और समर्थन बनाए रखना हमारी जिम्मेदारी है।

कक्षा - दसवीं (ई)

नीति के कुछ चिंतन - बिन्दु

- ❖ मानव की शोभा सौन्दर्य से नहीं संयम से है।
- ❖ अज्ञान ही विपदा है और ज्ञान ही संपदा।
- ❖ धन से बड़ा ज्ञान है, क्योंकि धन को हम रखते हैं, जबकि ज्ञान हमें रखता है।
- ❖ कुछ करने की इच्छा हो तो सब का भला करो।
- ❖ पालन करने की इच्छा हो तो सच्चे मानव धर्म का पालन करो।
- ❖ ग्रहण करना हो तो सत्पुरुषों के उत्कृष्ट गुणों को ग्रहण करो।
- ❖ दूसरों की निंदा और अपनी प्रशंसा कभी न करो।
- ❖ कुपित होना हो तो अपने क्रोध पर कुपित होना।

Events – January 2024

Pre-Board Examination for Classes 10 and 12th

Pre-board exams for class X started on 10th January, 2024 and for class XII on 17th January, 2024

Let us remember to whisper a prayer for them as our first batch of class XII will write their board exam from the 12th of February and class X take their board exam from the 21st February, 2024.

Let us ask God to bless them with the concentration and memory to recall all they have learnt so that they give their best.

66th Annual Conference CICSE/ISC

We actively participated in the 66th Annual Conference of Schools for the Indian School Certificate, held on **24th January, 2024** at Anvaya Conventions, Gachibowli, Hyderabad. The theme for the event was “Education for People, Planet, Progress and Peace.” Master Md. Anas Ahmed Khan penned his master piece poem, “Education for Peace” which was showcased in the form of a ballet. You can watch the event by clicking on the below given link.

<https://youtube.com/live/zOAzNyITciA?feature=share>

Education for peace

In halls of learning, minds take flight,
Where knowledge blossoms, pure and bright.
Education's beacon, a guiding star,
Ignites the path to peace afar.

Through books and lectures, hearts unite,
Suppressing the flames that wars ignite
Chaos and destruction tend to cease
Hence, education is the key to the door of peace.

Screams and cries that make the hearts ache,
Can be stopped with the wisdom gained from a page.
Dealing with loss and feeling of pain,
Can only be avoided by minds whom knowledge has tamed.

Ask a soldier his heart's desire,
"Pleasant air and cheerful streets"
He shall say in answer without letting a breath retire
For truly education is a gift that comes along with a
world at peace.

Md Anas Ahmed Khan [Class XII - AMEC-A]

26th January – 75th Republic Day

It marks the day when the Constitution of India came into effect in 1950, replacing the Government of India Act (1935) as the governing document of India. Republic Day holds immense significance in the hearts of Indians as a day of national pride, unity, and celebration of democracy. The chief guest for the day was Rev. Fr. P. R John S.J

It was an informal gathering of teachers for the flag hoisting, as it was also a "Day of Picnic for Teachers." A day meant to relax, enjoy the outdoor setting, bond with colleagues, and have a great time together outside the school environment.

IIT JEE/ NEET Foundation for classes 6th, 7th,8th, and 9th

In collaboration with Propel Academy, we intend to start Foundation classes for class 6-9 for the next academic year. An orientation was conducted for the interested parents on 3rd February 2024 at 9:00 a.m. It was an overwhelming response.

Conclusion

Each day brings with it a brand-new lesson to learn, promises to fulfil, work to schedule and a hope to make tomorrow better. Life is a race with a finish line that is known to none. Nevertheless, we are given a truckload of opportunities and a mind full of awareness. God has bestowed upon us the grace of knowledge and wisdom for our survival and for the greater good of this world.

We do realize that every moment is an opportunity and every breath, life. Then what are you waiting for? Self-realization is the first step that paves the path to success. It is time to chalk out new plans and meet deadlines. Let us surprise ourselves and pull out the reserves of our untapped energy and talents and use it to forge a future.

As we near the end of a school year, let us buckle up and burn the midnight oil to keep our promises. Let us be mindful of the rewards that await us. I am convinced that a determined soul and a conscious mind can never be conquered by negativity.
